You should therefore carefully consider whether such trading is suitable for you in the light of your financial condition. In case you trade on Stock exchanges and suffer adverse consequences or loss, you shall be solely responsible for the same and Stock exchanges/its Clearing Corporation and/or SEBI shall not be responsible, in any manner whatsoever, for the same and it will not be open for you to take a plea that no adequate disclosure regarding the risks involved was made or that you were not explained the full risk involved by the concerned stock broker. Stock exchanges, its Clearing Corporation, guidelines prescribed by SEBI and in force from time to time and Circulars as may be issued by Stock exchanges or its Clearing Corporation and in force from time to time. Stock exchanges does not provide or purport to provide any advice and shall not be liable to any person who enters into any business relationship with any stock broker of Stock exchanges and/or any third party based on any information contained in this document. Any information contained in this document must not be construed as business advice. No consideration to trade should be made without thoroughly understanding and reviewing the risks involved in such trading. If you are unsure, you must seek professional advice on the same.

In considering whether to trade or authorize someone to trade for you, you should be aware of or must get acquainted with the following:-

1. BASIC RISKS:

1.1 Risk of Higher Volatility:

Volatility refers to the dynamic changes in price that a security/derivatives contract undergoes when trading activity continues on the Stock Exchanges. Generally, higher the volatility of a security/derivatives contract, greater is its price swings. There may be normally greater volatility in thinly traded securities / derivatives contracts than in active securities /derivatives contracts. As a result of volatility, your order may only be partially executed or not executed at all, or the price at which your order got executed may be substantially different from the last traded price or change substantially thereafter, resulting in notional or real losses.

1.2 Risk of Lower Liquidity:

Liquidity refers to the ability of market participants to buy and/or sell securities / derivatives contracts expeditiously at a competitive price and with minimal price difference. Generally, it is assumed that more the numbers of orders available in a market, greater is the liquidity. Liquidity is important because with greater liquidity, it is easier for investors to buy and/or sell securities / derivatives contracts swiftly and with minimal price difference, and as a result,

investors are more likely to pay or receive a competitive price for securities / derivatives contracts purchased or sold. There may be a risk of lower liquidity in some securities / derivatives contracts as compared to active securities / derivatives contracts. As a result, your order may only be partially executed, or may be executed with relatively greater price difference or may not be executed at all.

1.2.1 Buying or selling securities / derivatives contracts as part of a day trading strategy may also result into losses, because in such a situation, securities / derivatives contracts may have to be sold / purchased at low / high prices, compared to the expected price levels, so as not to have any open position or obligation to deliver or receive a security / derivatives contract.

1.3 Risk of Wider Spreads:

Spread refers to the difference in best buy price and best sell price. It represents the differential between the price of buying a security / derivatives contract and immediately selling it or vice versa. Lower liquidity and higher volatility may result in wider than normal spreads for less liquid or illiquid securities / derivatives contracts. This in turn will hamper better price formation.

1.4 Risk-reducing orders:

The placing of orders (e.g., "stop loss" orders, or "limit" orders) which are intended to limit losses to certain amounts may not be effective many a time because rapid movement in market conditions may make it impossible to execute such orders.

1.4.1 A "market" order will be executed promptly, subject to availability of orders on opposite side, without regard to price and that, while the customer may receive a prompt execution of a "market" order, the execution may be at available prices of outstanding orders, which satisfy the order quantity, on price time priority. It may be understood that these prices may be significantly different from the last traded price or the best price in that security / derivatives contract.

1.4.2 A "limit" order will be executed only at the "limit" price specified for the order or a better price. However, while the customer receives price protection, there is a possibility that the order may not be executed at all.

1.4.3 A stop loss order is generally placed "away" from the current price of a stock / derivatives contract, and such order gets activated if and when the security / derivatives contract reaches, or trades through, the stop price. Sell stop orders are entered ordinarily below the current price, and buy stop orders are entered ordinarily above the current price. When the security / derivatives contract reaches the pre-determined price, or trades through such price, the stop loss order converts to a market/limit order and is executed at the limit or better. There is no assurance therefore that the limit order will be executable since a security / derivatives contract might penetrate the pre-determined price, in which case, the risk of such order not getting executed arises, just as with a regular limit order.

1.5 Risk of News Announcements:

News announcements that may impact the price of stock / derivatives contract may occur during trading, and when combined with lower liquidity and higher volatility, may suddenly cause an unexpected positive or negative movement in the price of the security / contract.

1.6 Risk of Rumors:

Rumors about companies / currencies at times float in the market through word of mouth, newspapers, websites or news agencies, etc. The investors should be wary of and should desist from acting on rumors.

1.7 System Risk:

High volume trading will frequently occur at the market opening and before market close. Such high volumes may also occur at any point in the day. These may cause delays in order execution or confirmation.

1.7.1 During periods of volatility, on account of market participants continuously modifying their order quantity or prices or placing fresh orders, there may be delays in order execution and its confirmations.

1.7.2 Under certain market conditions, it may be difficult or impossible to liquidate a position in the market at a reasonable price or at all, when there are no outstanding orders either on the buy side or the sell side, or if trading is halted in a security / derivatives contract due to any action on account of unusual trading activity or security / derivatives contract hitting circuit filters or for any other reason.

1.8 System/Network Congestion:

Trading on exchanges is in electronic mode, based on satellite/leased line based communications, combination of technologies and computer systems to place and route orders. Thus, there exists a possibility of communication failure or system problems or slow or delayed response from system or trading halt, or any such other problem/glitch whereby not being able to establish access to the trading system/network, which may be beyond control and may result in delay in processing or not processing buy or sell orders either in part or in full. You are cautioned to note that although these problems may be temporary in nature, but when you have outstanding open positions or unexecuted orders, these represent a risk because of your obligations to settle all executed transactions.

2. As far as Derivatives segments are concerned, please note and get yourself acquainted with the following additional features:-

2.1 Effect of "Leverage" or "Gearing":

In the derivatives market, the amount of margin is small relative to the value of the derivatives contract so the transactions are 'leveraged' or 'geared'. Derivatives trading, which is conducted with a relatively small amount of margin, provides the possibility of great profit or loss in comparison with the margin amount. But transactions in derivatives carry a high degree of risk.

You should therefore completely understand the following statements before actually trading in derivatives and also trade with caution while taking into account one's circumstances, financial resources, etc. If the prices move against you, you may lose a part of or whole margin amount in a relatively short period of time. Moreover, the loss may exceed the original margin amount.

A. Futures trading involve daily settlement of all positions. Every day the open positions are marked to market based on the closing level of the index / derivatives contract. If the contract has moved against you, you will be required to deposit the amount of loss (notional) resulting from such movement. This amount will have to be paid within a stipulated time frame, generally before commencement of trading on next day.

B. If you fail to deposit the additional amount by the deadline or if an outstanding debt occurs in your account, the stock broker may liquidate a part of or the whole position or substitute securities. In this case, you will be liable for any losses incurred due to such close-outs.

C. Under certain market conditions, an investor may find it difficult or impossible to execute transactions. For example, this situation can occur due to factors such as illiquidity i.e. when there are insufficient bids or offers or suspension of trading due to price limit or circuit breakers etc.

D. In order to maintain market stability, the following steps may be adopted: changes in the margin rate, increases in the cash margin rate or others. These new measures may also be applied to the existing open interests. In such conditions, you will be required to put up additional margins or reduce your positions.

E. You must ask your broker to provide the full details of derivatives contracts you plan to trade i.e. the contract specifications and the associated obligations.

2.2 Currency specific risks:

1. The profit or loss in transactions in foreign currency-denominated contracts, whether they are traded in your own or another jurisdiction, will be affected by fluctuations in currency rates where there is a need to convert from the currency denomination of the contract to another currency.

2. Under certain market conditions, you may find it difficult or impossible to liquidate a position. This can occur, for example when a currency is deregulated or fixed trading bands are widened.

3. Currency prices are highly volatile. Price movements for currencies are influenced by, among other things: changing supply-demand relationships; trade, fiscal, monetary, exchange control programs and policies of governments; foreign political and economic events and policies; changes in national and international interest rates and inflation; currency devaluation; and sentiment of the market place. None of these factors can be controlled by any individual advisor and no assurance can be given that an advisor's advice will result in profitable trades for a participating customer or that a customer will not incur losses from such events.

2.3 Risk of Option holders:

1. An option holder runs the risk of losing the entire amount paid for the option in a relatively short period of time. This risk reflects the nature of an option as a wasting asset which becomes worthless when it expires. An option holder who neither sells his option in the secondary market nor exercises it prior to its expiration will necessarily lose his entire investment in the option. If the price of the underlying does not change in the anticipated direction before the option expires, to an extent sufficient to cover the cost of the option, the investor may lose all or a significant part of his investment in the option.

2. The Exchanges may impose exercise restrictions and have absolute authority to restrict the exercise of options at certain times in specified circumstances.

2.4 Risks of Option Writers:

1. If the price movement of the underlying is not in the anticipated direction, the option writer runs the risks of losing substantial amount.

2. The risk of being an option writer may be reduced by the purchase of other options on the same underlying interest and thereby assuming a spread position or by acquiring other types of hedging positions in the options markets or other markets. However, even where the writer has assumed a spread or other hedging position, the risks may still be significant. A spread position is not necessarily less risky than a simple 'long' or 'short' position.

3. Transactions that involve buying and writing multiple options in combination, or buying or writing options in combination with buying or selling short the underlying interests, present additional risks to investors. Combination transactions, such as option spreads, are more complex than buying or writing a single option. And it should be further noted that, as in any area of investing, a complexity not well understood is, in itself, a risk factor. While this is not to suggest that combination strategies should not be considered, it is advisable, as is the case with all investments in options, to consult with someone who is experienced and knowledgeable with respect to the risks and potential rewards of combination transactions under various market circumstances.

3. TRADING THROUGH WIRELESS TECHNOLOGY/ SMART ORDER ROUTING OR ANY OTHER TECHNOLOGY:

Any additional provisions defining the features, risks, responsibilities, obligations and liabilities associated with securities trading through wireless technology/ smart order routing or any other technology should be brought to the notice of the client by the stock broker.

4. GENERAL

Stock that trades at a relatively low price and market capitalization. These stocks are generally considered to be highly speculative and high risk because of their lack of liquidity, large bid-ask spreads, small capitalization and limited following and disclosures. Depending on the market conditions and Risk Management Policy of the Stock broker, the Stock broker reserves the right to provide the limit in penny stocks and the losses, if any, on account of such refusal shall be borne by the client only.

b) **Setting up Client's Exposure Limit:**

The Stock broker may from time to time impose and vary limits on the orders that a client can place through our trading system (including exposure limit, turnover limit, limits as to number, value and/or kind of securities in respect of which orders can be placed etc.). The client is aware and agrees that the Stock broker needs to vary or reduce the limits or impose new limits urgently on the basis of the Stock broker's risk perception and other factors considered relevant by the Stock broker including but not limited to the limits on account of Exchange/SEBI directions/limits (such as broker level/market level limits in security specific/volume specific exposures etc.) and the Stock broker may not be able to inform the client of such variation, reduction or imposition in advance. The client agrees that the Stock broker shall not be responsible for such variation, reduction or imposition or the client's inability to route any order through the Stock Brokers' trading system on account of any such variation, reduction or imposition of limits. The client further agrees that the stock broker may at any time, at its sole discretion and without prior notice, prohibit or restrict the client's ability to place order or trade in securities through the stock broker due to but not limited to the reason of lack of margin /securities or the order being outside the limits set by stock broker/ exchange/ SEBI and/or any other reasons the stock broker may deem appropriate in the circumstances. The client agrees that the losses, if any, on account of such refusal or due to delay caused by such review, shall be borne exclusively by the client alone.

c) **Applicable Brokerage Rate:**

The brokerage rate applicable on clients trades will be as per agreed rates as mentioned in the Brokerage / Charges schedule at the time of opening the client trading account. Any higher brokerage will be levied only if agreed in writing between MSSL and the client or by advance notice of 15 days by MSSL to the client. If the client has any grievances' regarding the rate of brokerage charged then he should intimate the same to MSSL within four hours of receipt of the contract note/confirmation memo/bill.

The brokerage rate at no point of time will exceed the rates as may be specified by the Exchanges/ SEBI from time to time.

Unless otherwise agreed the brokerage will be exclusive of the following:

- Service Tax and Education Cess (including Secondary Higher Education Cess);
- SEBI/ Exchange/ Transaction / Clearing member / Other charges and /or levies;
- Stamp duty;
- Securities Transactions Tax (S.T.T.);
- Charges payable to Exchange/ SEBI/ Govt. Authorities etc. from time to time;
- Any other charges towards customized/ specialized service.

d) **Imposition of penalty/delayed payment charges:**

In case of delay in payment by the client to MSSL on its due date, MSSL in respect of such delayed payment will be entitled to recover late / delayed payment charges from due date. The said delayed payment shall include amounts payable by the client to MSSL in respect of initial margin, mark to market, shortfall of margin(s) in prescribed modes, and / or other margins and pay-in obligations. Late payment charges will be levied upto 2.5% per month or a part of month on delayed payment for the delayed period. The trade of the client may not be executed by MSSL if the client does not clear dues along with delayed payment charges. The client will not be entitled to any interest on the credit balance / excess margin available / kept with MSSL.

A delayed payment charge is applied to act only as a deterrent measure. The client should not construe it as funding arrangement. The client cannot demand continuation of service on a continued basis citing levy of delayed payment charges.

MSSL may impose fines/penalties for any order/ trades/ deal/ actions of the clients which are contrary to this agreement/ rules/ regulations/ byelaws of the exchange or any other law for the time being in force at such rates and in such form as it may deem fit. Further where the MSSL has to pay any fine or bear any punishment from any authority in connection with/ as a consequence of / in relation to any of the order/ trades/ deal/ actions of the client, the same will be borne by the client.

e) The right to sell clients' securities or close clients' positions, without giving notice to the client, on account of non-payment of client's dues:

The client is required to pay adequate margin/pay-in obligations in full and that it shall be the clients responsibility to ascertain in advance the margin / pay-in obligations requirement for its order/trades/deals and to ensure that the required margin /pay-in obligations is made available to MSSL in such form and such manner as may be required by MSSL from time to time. If the client's order is executed despite a shortfall in the available margin, the client shall, whether or not MSSL intimates such shortfall to the client, make up for the shortfall *suo-motto* immediately. The client shall be responsible for all orders (including any orders that may be executed without the required margin in the clients account) and/or any claim/ loss/damage arising out of the non-availability/ shortage of margin / pay-in obligations required by MSSL and/or by Exchange. The client shall fulfill all its obligations/ liabilities / dues to MSSL, failing which MSSL has the right not the obligation to square up all or any outstanding position and / or take offsetting positions and / or sell the margin / securities available with MSSL without giving any notice to the client. MSSL may also square up all or any outstanding position and / or sell the securities/collateral available with MSSL as a part of risk management at any time without giving any notice to the client. In case of purchase on behalf of client, the MSSL may close out its transactions by selling securities, in case the Client fails to make full payment to MSSL for the same before the time intimated by MSSL. In case of sale on behalf of client, the MSSL may close out its transaction by purchasing the securities. The client shall be liable for any losses, costs and be entitled to any surplus, which may result from the above.

f) Shortages in obligations arising out of internal netting of trades:

If a selling client who has sold shares of particular scrip on T day does not deliver shares latest by T+2 (i.e. by pay-in day deadline) and such quantity of shares results in internal shortages, then such quantity of internal shortage will be purchased from the market on pay-in day/or reported for self auction if provided by the Exchange. On T+2 (i.e. pay-in day) provisional debit will be given in client account at T+1 day's closing rate + adhoc margin as decided by MSSL from time to time.

On payout day of securities purchased in the internal shortage account, provisional debit bill amount will be reversed and client account will be debited with the amount at which securities are purchased on T+2 day. Fines / penalties / charges may be levied on account of internal shortage to selling client.

Due to internal shortage on account of internal netting of trades, the buyer client shall receive late delivery of securities. Buyer shall have no claims / rights against MSSL for delay in delivery of securities. It may also be possible that MSSL may not be able to obtain the required securities due to market conditions, then in such cases the buyer clients account will be credited and seller clients account will be debited as per the close out rate provided by the exchange for the relevant Auction settlement. Provisional debit bill amount will be reversed in the sellers client account.

Notwithstanding the above, the selling client who has failed to deliver the shares by due date and time shall be solely responsible for all cost, charges, penalties, damages, etc. arising out of such non delivery of shares. Above procedure is subject to change from time to time according to change in settlement procedure of the Exchange.

g) Conditions under which a client may not be allowed to take further position or the broker may close the existing position of a client:

Under the following conditions MSSL will not allow the client to take further positions or MSSL may close the existing position of a client:-

- 1) Insufficient / inadequate margin(s) and / or insufficient / inadequate free credit balance available with MSSL;
- 2) Scrips / stocks falling in Penny Stocks in clause (a) above;
- 3) Illiquid contracts / options;
- 4) Trades which apparently in the sole and absolute discretion of MSSL seems to be Synchronized trades/Circular trading/Artificial trading/ manipulative in nature, etc.;
- 5) Scrips banned by Regulatory authorities;

- 6) Where name of the client apparently resembles with the name appearing in the list of debarred entities published by SEBI/Exchanges and other regulatory authorities [where the information available for the debarred entity (other than name) is not sufficient enough to establish that the client and such debarred entity are one and the same];
- 7) The client fails to furnish documents/information as may be called for by MSSL from time to time as per regulatory requirement and/or as per its internal policy;
- 8) In the event of death or insolvency of the client or the client otherwise becoming incapable of receiving and paying for or delivering or transferring securities which he has ordered to be bought or sold.

In addition to the above MSSL can also close position of the client in case the client fails to pay his / her obligation/dues before pay in schedule of the exchange and/or as demanded by MSSL. Depending on the market circumstances if MSSL is of the view that the positions of the clients are / will be at risk then MSSL may close the existing position without waiting for the pay in schedule of the exchange.

h) Temporarily suspending or closing a client's account at the client's request:

At the written request of the client, the trading account will be suspended / closed. In case client request for closing the account then the client's funds and securities due to / from client will have to be settled at the earliest. Also the client will give a confirmation of no dues (funds and securities) to MSSL. Only after the settlement of funds and securities the clients account will be closed. If a client wishes to resume trading then client has to give a written request to MSSL for the same. In case after closing of account client wishes to resume trading with MSSL then fresh KYC formalities will be done.

i) Deregistering a client:

MSSL may at its sole discretion deregister a client without giving any specific reason. Necessary communication will be done by MSSL to client in writing or by email. On giving the intimation to de-register, the client's funds and securities, if any, will be settled at the earliest. The client will be given necessary notice period as required by the SEBI/Exchanges from time to time.

Due to de-registration, MSSL shall have the right to close out the existing open positions/contracts, sell/liquidate the margin (in any form) to recover its dues, if any, before de-registering the client. Any action taken by MSSL in terms of this policy shall not be challenged by the client, and MSSL shall not be liable to the client for any loss or damage (actual/notional), which may be caused to the client as a result. Also while de-registering the client, MSSL may retain certain amount/securities due/belonging to the client for meeting any future losses, liability, penalties, etc. arising out of dealing of the client with MSSL. In case if any securities retained by MSSL is sold/liquidated to recover any such losses, liability, penalties, etc., MSSL shall have the sole authority to decide the scrip, the mode, manner and the price at which to effect the sale of securities and the client cannot raise any dispute as to the manner, mode and the price at which the securities are sold by MSSL.

In any of the above circumstances, if the client is able to justify his / her, circumstances / reasons either by producing any record, document or otherwise to the full satisfaction of MSSL, then MSSL may reconsider its decision of de-registering the client. However in no circumstances any action taken by MSSL till the date of re-registration shall be challenged by the client and MSSL shall not be liable to the client for any loss or damage (actual/notional), which may be caused to the client as a result.

j) Treatment of inactive accounts:
